Mediacom Named Best Cable Operator In U.S.

Mediacom Communications was named the nation's top cable company and Internet service provider by an industry publication. In its annual Telecoms Awards issue, TMT Magazine announced that Mediacom won the Best Cable Operator & ISP in the United States for 2018. In 2016, Mediacom made the bold decision to undertake an aggressive 3-year, \$1 billion capital expenditure plan. Headlining the company's list of initiatives was more Iowa households to have access to 1 gigabit broadband than any other state in the country - thanks in part to "Project Gigabit," the deployment of 1 gigabit per second broadband services to around 3 million homes and businesses within Mediacom's 22-state footprint. WOW Upgrading Network In Dothan, Ala.

WOW is upgrading its network in Dothan, Ala., to support high-definition (HD) TV viewing across its entire channel lineup and doubling of its Internet speeds. After the upgrades are complete, WOW! plans to offer two Internet speed tiers in Dothan, 50 Mbps and 100 Mbps. The all-digital upgrade is also intended to prepare the network for further technology enhancements in the future. "Dothan is currently experiencing

impressive growth. With a pro-business economy, top-tier education, and exceptional healthcare and infrastructure, WOW! enables access to best-in-class broadband and Internet connectivity that can grow with their needs," said John Parkhurst, operations manager for WOW! in Dothan. "WOW! prides itself in treating customers like neighbors, not numbers. We're committed to keeping the community on the forefront of technology to attract new residents and businesses to the Wiregrass region - and it starts with fast, reliable Internet." [Read More](#)

Atlantic Broadband On An Upgrade Tear

Atlantic Broadband has increased its Internet speeds and expanded its TiVo deployments in a number of markets, including parts of Delaware, Maryland and South Carolina. The company has launched three new Internet packages in Middletown, Del., and surrounding communities, including Delaware City, New Castle, Odessa, Port Penn, St. Georges, Townsend and Clayton. The new speed tiers there include 50 Mbps, 100 Mbps

and 250 Mbps. Atlantic Broadband has launched those same packages in Grasonville and Perryville, Md., including the surrounding communities of Chestertown, Centreville, Queenstown, Rock Hall, Church Hill, St. Michaels and Chesapeake City. After the upgrades, Atlantic Broadband's fastest Internet speed in those markets has more than doubled. "We know how critical superfast Internet is to our customers who rely on our Internet services every day to power multiple devices in their homes," said Scott Randall, Atlantic Broadband's vice president and general manager, Maryland/Delaware. "We are pleased to make this major speed enhancement available to the communities we serve in the region." [Read More](#)

Blue Ridge Launches Integrated TV Experience With Voice Remote

Palmerton, Pa. – Blue Ridge Communications, a leading provider of high-speed Internet, TV, phone, and home security, announces the rollout of TiVo Experience 4, coming to Blue Ridge customers on August 20, 2018. The next-gen TiVo user experience offers Voice Activated Remote Control, a newly designed on-screen user interface that is sleek, visually appealing, technologically advanced and simple to use. Customers will be able to search for content faster and more easily across multiple sources, including live TV, On Demand, DVR and streaming services like Netflix, Hulu and HBOGo. In addition to consumer availability of TiVo Experience 4, Blue Ridge will soon be offering IPVOD to customers, which will be powered by TiVo's Next-Gen Platform, a flexible, diversified portfolio of products supported by a cloud-based backend and powered by the ultimate entertainment experience. GCI Invests In The Kenai Peninsula

Alaska-based GCI has worked hard this year to bolster broadband service across the Peninsula. GCI launched 1GIG Internet service, the fastest speed available to consumers, in Kenai, Seward and Soldotna earlier this year and will deliver 1GIG to customers in Homer in September. More than 77% of Alaskans have access to 1GIG Internet, enjoying the same speeds as you would in major metropolitan areas like Los Angeles or San Francisco.
